

Evita CABINETS

EVITA LINE FINISHES SPECIFICATIONS

- PBO, PBO RH or MDF board with impregnated decorative coating with melamine resin.
- Totally closed surface, free of pores and resistant to surface wear.
- Copper Nanoparticle Protection that removes up to 99.9% of viruses and bacteria at 60 min of contact and it is effective against the virus that causes COVID-19. The effectiveness studies were carried out on the Human Beta coronavirus OC43, which is considered the same family and subfamily than SARS CoV-2.
- Our boards meet and exceed international Taber test standards and are resistant to exposure to sunlight, maintaining their original appearance and color over time.
- The products come from sustainably managed forests under FSC certification and Carbono Neutral certification, which means that through its native forests and forest plantations it gains more CO2 than it generates in the entire production process.
- In the latest update of LEED V4.1, the use of products with Carbono Neutral certification is accepted to score points.
- ISO 21702 against viruses and ISO 22196 against bacteria.
